

ENERGY IS POWER

THE ANTI-NUCLEAR STRUGGLE CANNOT BE SEPARATED FROM OTHER FORMS OF OPPOSITION TO THE CAPITALIST SYSTEM AS A WHOLE BECAUSE IT IS ONLY THE EXTREME EXPRESSION OF THIS ECONOMIC MODEL BASED ON THE SAVAGE EXPLOITATION OF HUMANS AND NATURE

NUCLEAR ENERGY IS: A precise choice made by capital to overcome its economic (as opposed to 'energy') crisis due to waste and production geared towards profit and not social wellbeing.

NUCLEAR ENERGY IS: Deformation of life. Destruction. Death. Already today energy production and misuse has been and continues to be the cause of the deaths of millions of men and women in the mines, the factories, the wars manipulated by the great powers for the control of energy sources.

NUCLEAR ENERGY IS: The result of scientific research always and solely addressed towards the support of capital, manipulated by the mass media to make us believe that this perspective is the only one possible. Only when energy production is in the hands of the people themselves will the known safe sources of energy be widely used and new ones discovered.

NUCLEAR ENERGY IS: The highest and most dangerous form which the State and the multinationals have developed to reach the ultimate in social control at the work place and throughout the whole of social life. Militarization of the factories, special police, ID cards and computerised files justified by the hazardous risk of the materials involved. The final step in the negation of the individual. ENERGY MANAGEMENT IS A QUESTION OF POWER.

NUCLEAR ENERGY IS: Only one facet of the whole spectrum of capitalist exploitation, and a struggle against this taken as an end in itself will not only be in a vacuum but could even be used by capital itself in order to maintain wide areas of social acquiescence.

TO STOP THE CRIMINAL PLANS FOR THE CONTINUATION OF NUCLEAR POWER INSTALLATIONS AND THEIR GENERALISED USE MEANS TO STRUGGLE, SUBVERT AND SABOTAGE THE CAPITALIST ORGANISATION OF LIFE/DEATH IN ALL ITS FORMS

A few Brixton anarchists
